About the School
Our Vision

We envision a world in which all mine-affected Arab and friendly Countries are enabled to their fullest potential to achieve freedom from the impact of mines/Explosive Remnants of War (ERW)
RSHDL’s Mission

The RSHDL provides courses and workshops compatible with the International Mine Action Standards (IMAS). Our courses are intended for military and civilian personnel involved in humanitarian demining from the Middle East and North Africa.
The School’s Facilities

With the financial help from good and generous hands we have created some decent and well designed training facilities to produce high quality training: 2 classrooms, 1 computers room, 1 conference room, 1 exhibition hall and numerous training areas.

It is also worth mentioning that we have single and double bedrooms and a dining hall.
Most of our courses are planned in an annual schedule, while some courses are organized outside of the planning. As soon as a course is listed in upcoming courses, qualified people can fill out a registration form. Once someone is selected for the enrolment on the course, he will receive an email containing all the details about the course and the administrative documents to be prepared.
France has been an outstanding partner helping the school financially and operationally with the aid of the French advisor.

Donors
France, Italy, European Union, Jammal Trust bank, Blom Bank.

Arab regional Cooperation Program
ARCP is a key partner in assisting of the promotion of the school

France
France has been an outstanding partner helping the school financially and operationally with the aid of the French advisor

Lebanese Armed Forces
LAF is the main stakeholder and supporter in this project

Challenges
Our utmost challenge is to sustain the work and progress of the school. This sustainability depends mostly on the financial support covering the costs of training and transportation for trainees from Middle East and North African countries willing to attend our courses.
Thank you
