Mine Action and Global Humanitarian Architecture
What is the Mine Action Area of Responsibility?

- **Vision:** a world in which people in emergencies are protected from explosive ordnance and in which victims have access to victim assistance.

- **Goal:** a partnership of organizations that works together towards a shared goal of ensuring predictable, well-coordinated and equitable provision of all pillars of humanitarian mine action for populations affected by explosive ordnance in humanitarian crises.

- **Leadership:** at the global level UNMAS and an NGO co-lead (Humanity & Inclusion).

- **Members:** UN entities, NGOs, and academic institutions.

**Key functions:**

- Advocate for coherent and visible mine action in humanitarian responses
- Bring together mine action actors to share knowledge and maximize resources
- Be the mine action voice in broader humanitarian policy dialogue
- Develop strategic partnerships with other clusters or sectors
Iraq:
- UNMAS, HI, NPA, ACTA, DRC
- 7 projects
- $22,712,149

- 8 projects
- $10,595,714

Myanmar:
- UNICEF, DDG, HALO, NPA and 49 other organizations
- 18 projects
- $6,259,632

*UNDP only
Prevention/Response to impact of explosive ordnance on children

UNICEF, UNMAS, UNHCR, Save the Children, HI prepared requested a ProCap deployment. Objective to improve inter agency/cluster collaboration around four “collective outcomes” that are part of core mandates of each the respective clusters/agencies;

- Prevention (essentially reducing rate of children killed and maimed by EO)
- Reducing Mortality (Increasing survival rate of children who have had an accident)
- Increased Personal Capacity (medium term health services to improve physical and mental health for child survivors)
- Social Inclusion (Range of activities, including assuring children gain access to education)
